POLYPROPYLENE
STRAPPING

TEWE® PP

Products made of different materials and in varying sizes and shapes need to be packaged and transported securely. TEWE® PP strapping is the ideal packaging solution for a wide spectrum of applications, for example, for construction materials, printed matter, in logistics, for furniture, corrugated board and newspapers.

TECHNOLOGICAL LEADERSHIP

With TEWE® PP, you will benefit every day from our technological leadership in the extrusion of strapping. Our own R&D department develops custom-tailored solutions for the safety of your goods while in storage and transport.

SAFETY

The safety of your goods is ensured by the ideal combination of elongation and holding force. The reliable quality of TEWE® PP is a product of the use of premium raw materials and our 40 years of experience in the extrusion of polypropylene.

SPEED

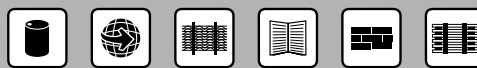

The excellent stiffness and perfect running characteristics of TEWE® PP allow highest speeds and optimised cycle times. Special embossing techniques make TEWE® PP virtually dustfree to keep your machines running.

HEALTH

TEWE® PP is produced without the use of toxic additives. All PP strapping products are 100% separable and recycleable.

YOUR BENEFIT

- Troublefree operation
- More than 50 strapping cycles per minute
- No splitting
- No dust
- Wide TEWE® PP product range
- Suited for all applications
- Consistent high quality
- Optimised strap stiffness
- Tested quality for use on automatic strapping machines
- Expertise for users
- Training courses for partners

TYPE RANGE

TEWE® PP

	Product	Name	Description
Standard	TEWE® SA	SemiAutomatic	High quality strap for semi automatic machines and standard applications
	TEWE®		<p>TEWE® S: High quality automatic strap from 4-6 mm width fulfilling the high speed and quality requirements of the newspaper industry</p> <p>TEWE® A: High quality automatic strap from 7-16 mm width</p>
	TEWE® HE	HighElastic	High quality automatic strap with high elongation for applications with shrinking packaging volume and sharp edges.
Special	TEWE® SHE	SuperHigh Elastic	High quality automatic strap with very high elongation for smallest packaging units or applications requiring highest elongation.
	TEWE® LCE	LowCreep Elongation	High quality automatic strap with low elongation for compressed packaging goods requiring low elongation
	TEWE® UV	UV	High quality automatic strap UV stabilised
Extra	TEWE® P	Printed	High quality automatic strap one colour quality printed
