

The declaration of incorporation of partly completed machine

under the EC Machine Directive 2006/42, Annex 2B..

Manufacturer

Cyclop AB
Regementsvägen 10
SE-852 38 Sundsvall

Declare under our sole responsibility

that the partly completed machine with

Type: Semiautomatik strapping station K-F-E
Serial no: 698
Manufacturing date: 2011-08

with field of applications to strap wooden package. The strap feeder feeds the strap around the package, forms a loop over the package and the tail shots out in the bottom of the machine. The operator takes the loop and the tail, join them together and seals them with a hand tool.

is intended to be installed in (inside) a larger machine or assembled with another machine, which together will constitute a machine covered by Directive 2006/42 concerning machines and who shall be manufactured in accordance with Council Directive 2006/42.

that the relevant parts of the annex 1 of the essential health and safety in the design of the machines have been performed and the relevant technical documentation is compiled due to Annex 7, Section B.

At the substantiated request of national authorities, relevant documentation on the partly completed maskin will be delivered.

and declares further that the partly completed machine must not be put into service until the machine, it must be installed in or form part of, has been found and thus declared in accordance with Council Directive 2006/42, Annex 2A.

the following other directives and / or normative documents are applied:

Low Voltage Directive 2006/95.
EMC Directive 2004/108.

Remaining risks according to Machine Directive 2006/42 Annex 1

If the machine is not built in with safety fence and / or safety sensors (an option not included in the machine's standard). The machine is manually operated so the risk is limited.

To remove residual risk described above:

Place the machine inside a safety fence and / or safety sensors. The machine is manually operated and the fence must be open for the operator to handle the strapping.
