

Dear partner and customer.

H. Clausen AS has existed as a family-owned company since 1846.

On 23/01/2023 we have now made a strategic choice and got the wonderful company STOK Emballage on board.

STOK Emballage was established in Denmark in 1978 and has developed into one of the largest and most important players in packaging solutions for industry and trade with a turnover of close to 1 billion converted into Norwegian kroner.

H. Clausen AS was lucky enough to get to know STOK Emballage in 2018 through our joint European packaging network PackSynegy, a network consisting of dealers in 22 European countries with a total turnover of over €500 million.

Through our new co-owner, we now have access to a much wider range as well as many new great products that will strengthen our position in Norway. With the purchase, we get enormous expertise as well as long and broad experience within various industries.

We have set ourselves the goal of becoming a significant player on the Norwegian market. With packaging machines, consumables, packaging solutions and our own service workshops, we look forward to tackling the future.

H. Clausen AS continues in the future with the same name and the same fine people so that you as a partner will only notice benefits.

Our salespeople will continue to work purposefully to offer the best solutions for exactly you and your needs within packaging solutions. This way, as a partner and customer, you get a good experience and an optimized product.

Together we solve most things.

We look forward to hearing from you!

Kind regards, Kyrre Clausen and his team.
